

**This Linux Distro “Calculate Linux” comes with Multi Language Support and for Security has No Systemd and No XCB, has certain modules removed from the OS ...**

**Calculate Linux is Gentoo based making it stable and fast, also you can easily spoof the mac address to F4 or Random if you want to thwart Network Attacks, it also comes with Ublock Origin pre-installed if you want to operate it as a Live USB or Live SSD on Ventoy .....**

**Now Patched as of 2022 for now ...**
